Municipal Hospital For Wetaskiwin District

A. K. WHISTON GIVES INTERESTING AND VALUABLE INFORMATION
AT PUBLIC MEETING. HIGHEST RATE IN PROVINCE IS 4c AN
ACRE AND LOWEST 2 1/2c. DETAILS OF FINANCING GIVEN.

Addressing a hospital meeting here Friday evening, A. K. Whiston, secretary of the municipal hospitals branch of the provincial department of health, summarized the results for the year 1926 of the eight municipal hospitals now in operation in the province as follows: up to date statistics, good organization of these districts should be available for other public health activities. It is therefore our policy that the municipal hospital district be the field for the public health nursing activities; that the municipal hospital branch in preparing future

25,193 days of 414 maternity cases. The life of not one mother had been lost. Major operations to the number of 176 and minor operations to the number of 378 had been performed. The highest per acre in any district was 40 cents per acre and the lowest is 2½ cents per acre per year. Five new districts are already included in the scheme.

The 1921 program, which will bring the total number of organized hospital districts up to seventeen. By the end of the current year, Mr. Whitson predicted that two-fifths of the province south of Peace River would be organized and under way, which is a proud record.

Mr. Whitson went carefully into the details of financing the various hospitals. Six districts, giving a rate of one dollar a day to their patients, with no extra charges for operating room or any extra services of that kind, are

proposed for organization in the 1921 program are Ledne, Camrose, Wetaskiwin, Lacombe, Stettler, Big Valley, Red Deer and Innisfail. Calgary has been completed.

Bear Half Cost Nursing

Discussing the relation of public health nursing to municipal hospitals, Dr. H. J. Macdonald, of the University of Alberta, stated that the average cost of nursing in the hospital is \$1.00 per day, with charges of \$2.50 and 75 for the operation of the hospital.

Mr. Whiston explained the plan recently adopted by the department of shunting the expenses fifty-fifty with the district. Several nurses are now at work in municipalities and school districts on this basis, but it is the desire of the department to have this

lowest tax rate, $2\frac{1}{2}$ cents per acre, charges a flat rate of \$2 per day to patients. In the district of Bassano the rate is four cents per acre. The following detailed records of

sa, Catherine, Ont., Feb. 20.—Farmers on the market here Saturday asked seventy cents a dozen for eggs, but the women patrons of the market refused to strike the price.

The farmers finally dropped the price to forty-five cents a dozen. The women, however, refused to buy eggs on the market on Saturday at any price.

"We taught the farmers a lesson today that they will remember," one of the strike leaders declared.

TWATSK. SCHOOL.

LOSERS DEBATE.

"Two special trains on Monday began their itineraries in Alberta, under the auspices of the department of agriculture. One of them is a short course for the benefit of the farmers of the Beaver Lodge, Grande Prairie, High Prairie, Peace River and High Prairie, in the order named. A list of speakers on the first train, which left Edmonton at 10 o'clock, were: J. H. Foley, F. S. Pearson, J. Clements and S. G. Crebore. Livestock interests will be the chief topic dealt with in the lecture course. The second train, which left Edmonton at 11 o'clock, is for the sheep industry at the request of the northern wool growers.

The west train which has been touring Manitoba and Saskatchewan now enters Alberta and will be in the pro-

The meeting of the Wetaskiwin High School Literary and Debating Society on Friday, Feb. 18th, began

cial Debating League, conducted by the Extension department of the Un-

The judge was Professor P. A. Wallace of the University of Alberta. The subject was "Resolved that, in the interests of the province, the right of testamentary inheritance should be limited to the provision of reasonable support for immediate dependents." While no specific amount was named the term "reasonable support" should be interpreted to mean an amount varying from \$200,000, depending on circumstances.

The visiting team consisted of A. Craig, deputy minister of agriculture, is meeting the train at Irvine, and will spend a few days with them to inaugurate the Alberta tour.

The Judge was Professor P. A. Wallace of the University of Alberta. After commending the debaters of both sides very highly, the decision was given in favor of the affirmative by 1300 points.

Stanley Ross and Helen Boyle of Victoria High School, Edmonton, and the home team of Clarence Greiner and Mary Waldren, the home team taking the affirmative side of the debate. The After the visiting team in Edmonton had received the decision of the judge, the principal there, in a brief speech, complimented them, saying they were the strongest opponents his own team

Wetaskiwin representatives going to Edmonton were Edwine Johnstone and Walter Recknagle.

Exchange Bulletin Board

THAT PERSISTENT HACKING, RACKING COUGH

Can Be Quickly Relieved By Dr. Wood's Norway Pine Syrup.

The terrible, hacking, lung-racking cough that sticks to you in spite of everything you have done to get rid of it, is a great danger to your health, and the longer it sticks, the more serious the menace becomes.

The constant coughing keeps the lungs and bronchial tubes in such an irritated and inflamed condition they get no chance to heal.

You will find in Dr. Wood's Norway Pine Syrup a remedy that loosens the phlegm and helps and soothes the lungs, thereby fortifying them against serious pulmonary diseases.

Mr. J. W. F. Wilkie, Vermilion, Alta., writes: "I wish to express my thanks for what Dr. Wood's Norway Pine Syrup has done for me. For a number of weeks I had been suffering from a very severe hacking cough, and all the time I tried failed to relieve me. At last I secured a bottle of Dr. Wood's, and after taking it I secured great relief. Needless to say it is now my intention to always keep a supply on hand."

"Dr. Wood's" is 25c and 50c, a bottle at all dealers. The genuine is put up in a yellow wrapper; three pine trees the trade mark; manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

GOVT ASKED TO PAY HALF COST

Making the strongest possible representation as to the needs of the various municipalities for a much larger measure of public support in the carrying on of high school work.

Mayor Hardie of Lethbridge said the government would have to take over high school obligations before long. It was pointed out that the cost of educating 250 pupils was about \$40,000, and fully one hundred of these pupils came from the outside, as far distant as the Montana border.

Mr. R. C. Black of Medicine Hat said in his city high school costs had mounted from \$10,000 to \$36,000 in six years, and in reality the city could not collect the amount demanded for annual school purposes. The cost of educating 250 pupils was about \$40,000, and fully one hundred of these pupils came from the outside, as far distant as the Montana border.

At the close of the conference, after the minister of education, Hon. G. P. Smith, had outlined probable changes in the system of government school assistance during the present session, acting premier C. R. Mitchell stated frankly that as provincial treasurer, the municipality could not hope for any material advance in existing allowances unless there was provision made for additional taxation for the purpose. Already the departmental estimates were such that the revenue of the province would be taxed to the utmost and the government would have to take the application of the department into definite and detailed consideration in order to determine on a line of action. He said the case presented was recognized as serious and the government would have to make the most careful thought without delay.

It was the consensus of opinion of all speakers from the delegation that the burden of high school costs cannot continue to be carried by the municipalities unless there is granted a greater measure of government assistance, or that other sources of local revenue are enlarged. The chief trouble was that the lack of funds provide very largely a state service rather than local, and that the number of non-resident pupils taken care of by these institutions constitute a charge on the local ratepayers which cannot be borne.

The minister of education admitted the force of the arguments advanced but stated plainly that the government's first obligation must be to elementary schools of the province, since there were so many districts where even the common school costs could not be raised. When this responsibility was met to a reasonable degree, then the government would do the utmost for secondary schools.

He thought the establishment of high school work in rural schools where possible, as proposed by the government in new legislation, would in some measure relieve the situation in the towns and cities and would enable students in the country to take higher educational work who would otherwise be denied the privilege.

He quoted figures to show that in reality the cities had been treated much more generously of late years, when it was claimed by Trustees of Edmonton that the outflow of relief would in reality not help out the cities to an appreciable degree. Mr. Smith said that in 1918 Calgary got \$15,400, Edmonton \$27,644, Lethbridge \$7,551, and Medicine Hat \$8,800 in government grants while in 1920 the amounts were respectively \$45,000, \$72,000, \$11,000 and \$15,500, the rating being on a basis of special instruction provided.

The delegation consisted of Mayor Duggan, Ald. Bowen and Trustees R. B. Bishop and James of Edmonton, who also represented the Calgary office; Mayor Hardie, J. P. Stewart, J. E. Herrell and M. Freeman of Lethbridge; R. C. Black, Medicine Hat; Mayor W. P. Forester and D. B. Olson, Camrose; Mayor Fowler and D. MacEuchair, Wetaskiwin; Mrs. C. T. Goss and C. B. McGeachal, Oliver; M. Holmes, Claresholm; C. N. Macdonald, Lacanville; W. E. Payne, Red Deer; Dr. W. Evans, Didsbury; Mayor Fawcett and P. Morris, Medicine Hat; J. A. Mitchell, M.L.A., for Thompson and Chinook schools.

AM. J. C. Bowen of Edmonton introduced the delegation to the cabinet, consisting of acting premier Mitchell, Hon. J. E. Boyle, Hon. C. E. St. Martin, Hon. Duncan Marshall and Hon. J. L. Goss. Previously to meeting the ministers the delegation had a meeting to decide on a policy of application. Mayor Forester of Vancouver stated that the burden of high school costs was becoming unbearable in the towns; that the high school was in reality a municipality's load and therefore not an excessive obligation on a municipality, and that in Wetaskiwin, out of 120 pupils in the high school, 80 came from outside the town and contributed nothing to the cost of the school.

Dr. Evans, Didsbury, said the government would either have to increase taxes or create larger high school districts so that the taxation burden would be spread out. People from the high school districts really expected to

NEW "CANADA WEST" BOOKLET

The Times has just received a copy of a new "Canada West" booklet from the Publicity Branch of the Department of Immigration and Colonization, Ottawa.

The booklet gives an accurate description of Manitoba, Saskatchewan, Alberta and British Columbia, particularly with reference to opportunities for farmers. There are many illustrations, and double-page maps in four colors of each of the provinces and of the Dominion.

The "Canada West" booklet has been prepared especially for circulation amongst persons in the Old Country who would be interested in becoming farmers in Western Canada. Any reader of this paper may have copies of "Canada West" sent to his friends in the Old Country who are contemplating coming to Canada, by sending their names and addresses to the Director of Publicity, Department of Immigration and Colonization, Ottawa. No charge is made, either for the booklet or for postage on it.

RED DEER BOY DIES—APPARENTLY FROM NEGLECT

Red Deer, Feb. 11.—Edward Rainey, a farmer eight miles north of this town, and his wife, are on preliminary trial on a charge of manslaughter, and the entire countryside has been roused to a pitch of violent indignation, as the result of the death of Johnny Woolley, aged 15, who was charged for the Rainey, and who was found last week in a frightfully emaciated condition on the farm, as a result of apparent exposure to the cold, and malnutrition while in the hospital.

The boy's condition was discovered by a Red Deer doctor, who was called in by the Raineys some days ago. The boy was brought into the hospital, and his condition was such that he lived only three hours. Rainey himself was arrested last Saturday, after the coroner's jury had returned a verdict of ill-treatment and neglect, while the case of the two people; the wife was also arrested. The trial, which has been proceeding for some days, will continue in the morning. Magistrate Lawrence is sitting on the case.

While the man and his wife refused to give evidence at the inquest on advice of their counsel and have made no statement at the trial thus far, it has been suggested by the defence that the boy's injuries were self-inflicted, as a result of stubbornness in refusing to do the chores set for him. It is believed this will be the line of defence to be set up.

Mystery surrounding the case has been enhanced by the burning of the barn of Rainey after he had been locked up on Saturday, and while his wife was still on the farm. Their dog was also shot and four of their cows. The police are now investigating the cause of the fire.

The parents of the Woolley had been in the Peace River country since last summer, where they went to take up land. Before that time, the boy was made over for one year to the care of the Raineys, on the agreement that in return for doing chores about the farm he was to be clothed and boarded and sent to school.

According to evidence, the boy appeared to be happy in his new home up until last October, when apparently trouble began. The alarming condition of affairs was not discovered however, until the farmer and his wife, frightened at the condition of the boy, finally called in a doctor last week.

The doctor found the lad almost reduced to a skeleton and in a terribly emaciated state. The fingers of his hands were rotting away, and the ends of both of his toes had dropped off, leaving the bone exposed, the result of frost-bites apparently a month or more ago. His body, nothing more than a frame of skin and bone, had suffered a large number of bruises. The post-mortem examiners declared the lad had died from malnutrition, blood poisoning and pneumonia.

Coroner's jury returned a verdict of death from ill-treatment and neglect.

THE IRON DOLLAR

In older days with one round dollar how much good fodder I could buy! And then I'd stand around and holler the price were too high! I used to look at the farmer and tell him to go with his bull, and he would say, "I have you know, sir, that all this corn you buy a shunk." And to the butcher I would holler and buy a soupçon for a dime, and merrily my wife would yield as she brewed comestible soup. And at the urban haberdashery a dollar bought a gaudy shirt; and I could buy potato mashers and other hardware cheap as dirt. Oh happy days when one round dollar would buy a wagon-load of truck! And now I know of nothing sweeter, what I go shopping, than a buck. And in those days that I'm regretting, when dol-

DON'T TAKE A FIRE CHANCE

Spontaneous combustion probably causes more fires than are attributed to it, from the fact that in order to determine whether a fire originates in this manner or not, it must necessarily be investigated at its very commencement before the flames have destroyed the evidence of its cause.

It is only within recent years that spontaneous combustion has been reasonably understood. The investigation and explanation of scientific men, coupled with the efforts of fire underwriters in collecting and publishing the causes of fires, has led to the acceptance by the general public of the fact that it is possible to ignite many substances without the application of fire, heat or flame, merely by the chemical action of the materials themselves.

Spontaneous combustion is generally due to the absorption of oxygen from the atmosphere by various substances which have an affinity for it. The rapid drying of certain kinds of oils, especially vegetable oils, like linseed, and the drying of moist charcoal, results in the rapid absorption of oxygen to the extent of ignition.

Oily waste, which has been used to wipe off machinery, should never be thrown carelessly into a corner, but should be kept in a metal container and removed from the premises daily.

Householders should exercise great care in connection with cloths that have been used for polishing furniture and hardwood floors.

It is well known that hay, when stored away too green or wet, is very liable to set on fire by the heat generated in fermentation. It is claimed that if the mow is pierced with

holes to permit escape of the gases and heat generated, no combustion can take place.

Most vegetable substances, as well as oatmeal and bran, when packed together in a confined place, without being sufficiently dry, undergo fermentation or heating, and are liable to take fire.

Keep your premises clean. Do not allow rubbish to accumulate in dark corners, closets or concealed places. Help keep down the cost of your insurance premiums.

WEEDS

It is impossible to estimate even approximately the loss caused by weeds to Canadian agriculture. A bulletin recently published in the United States estimates the annual loss due to weeds in that country at more than \$300,000,000. Not long ago a western paper stated that the annual loss to farmers of Saskatchewan due to weeds was not less than \$25,000,000. If this is lost in one province the total for all Canada must be tremendous. There are many districts in the Dominion that stand high in weed production.

Weeds cause a direct, actual money loss such as those due to drought, hail or frost. There is also a loss in depreciation of property badly infested with weeds.

We do not know the full reason why weeds reduce crop yields, but it is well known that weeds deprive crops of moisture, plant food and sunlight, which cause decreased yields. A crop of grain or grass and clover seed which contains weed seeds will not grade No. 1 and there are certain weed seeds which it is well known impossible to screen out. Every time a sample of grain or grass seed drops a grade the price is lowered.

Weeds cause much extra work. They must be hauled a number of times in a grain crop, and extra ploughing and cultivating are necessary in a weed-infested field if a crop is to be obtained. Net profits are reduced because of increased costs of production and of cheapened product. In a sense farming is a war on weeds. This warfare must be unrelenting and relentless if the farmer is to emerge victorious. Many men make a start to clear their farms of weeds but quit too soon. The campaign is stopped when success is in sight. The plan of attack must be carefully made and

faithfully carried out. Every farmer should be his own weed inspector and his own weed eradicator.

Lack of careful planning with reference to weeds is too frequently evident throughout Canada. One man puts in more head crop than he can properly care for; another fails to follow a short or systematic rotation of crops; still others fail to give the land sufficient preparation for their crop or sow seed that is foul with weed seeds. It is because these things have not been given sufficient consideration in the past that the evil conditions of today prevail. The weed problem is one of national concern and calls for active co-operation on a large scale. Every member of the community is affected and should lend assistance. Farmers, weed inspectors, owners of vacant property, township and county councils, and governments must work together if weeds are to be held in check.

The problem is how to get rid of weeds and keep them out. First, follow a short rotation of crops; cultivate the land thoroughly and often; prevent weeds going to seed; clean all seed before it is sown.

If the grain field is weedy, seed it heavily to clover and grass; mow the stubble and biennials before they seed and pasture closely to keep down perennials, follow by a hoed crop or another crop, and most varieties of weeds will be checked.—F. C. Wainick.

Pure Beef Cubes

A Slow, Sluggish, Torpid Liver

RESPONSIBLE FOR MANY ILLS.

Millburn's Lax-Liver Pills stimulate the sluggish liver so that it will regulate the flow of bile to act properly on the bowels and thus clear away all the waste and poisonous matter that is responsible for constipation, biliousness, sick headaches, heartburn, jaundice, etc.

Mrs. Alice McMill, Naperville, Ont., writes:—"I was very badly run down and had a torpid liver for several months. I tried several remedies, but got no relief. One day my husband brought me home a box of Millburn's Lax-Liver Pills, and before I had used half the box I was much better. I only used two boxes and I am a different person today. I can safely recommend Lax-Liver Pills to any one troubled with liver trouble."

Millburn's Lax-Liver Pills are 25c. a box at all druggists, or mailed direct on receipt of price by The T. Millburn Co., Limited, Toronto, Ont.

Save Your Eyes

HAVE YOUR EYES EXAMINED

While I am in town have your eyes examined. I will tell you if glasses are necessary or not. For thirty years I have studied the optical requirements of the public, and have diligently sought to eliminate not only their problems of vision—but by fitting with right glasses—but in giving the utmost in comfort and utility as well.

Here you will find a superior service by men of long experience in the making of satisfactory glasses.

New York C. P. R. Building

Great interest is being taken by New York transportation and real estate men in the decision taken by the Canadian Pacific Railway to concentrate its various offices into one building close to the Grand Central Station.

The Canadian Pacific deal, which has required an entire year to close on account of its elaborate ramifications, involves a lease from the Madison Avenue Office, Inc., the holding corporation for the Fifth Church of Christ Scientist, of a large store, basement and almost the entire second floor of the 44th Street portion of this twenty-one story building; and also involves an interest of considerable proportions by the Canadian Pacific Railway Company in the building itself, in consideration of which the name of the building will be changed from "Madison Avenue Office, Inc." or, as it has sometimes been referred to, the "Christian Science Building," and will be renamed the "Canadian Pacific Building."

The area of the plot on which the building stands covers over 31,000 square feet, and is situated directly opposite the Hotel Billmore on the east end, Brooks Brothers' building on the south and the old Hotel Manhattan to the south.

The Canadian Pacific Railway will occupy the store, basement and second floor, all that part of the building on which only a few ago stood St. Bartholomew's Church, demolished last April, to make way

for the great uptown trend of business.

The negotiations just closed provide, in addition to the investment mentioned above, a lease for 21 years at an aggregate rental of \$5,000,000. It was said by F. R. Perry, General Agent, Passenger Department, in New York, for the Canadian Pacific, that it will give up its railway offices at Broadway and 30th Street and its branch at Broadway and 33rd Street, and will combine its railway, steamship, and transportation departments in its new home on Madison Avenue.

The plans of the Canadian Pacific Company are particularly significant in that they will provide the largest consolidated ticket office in New York, for in addition to their own occupancy, it is said by the agents of the new Canadian Pacific Building, that negotiations are pending with several of the largest continental railroads for representation in the same store. This arrangement is similar to the Railroad Administration during the war. The store has a frontage of 81 ft. 6 in. on Madison Avenue and 140 ft. 6 in. on 44th Street. The Canadian Pacific Building will contain over 600,000 square feet of rental space and will be the most up-to-date office building in the Grand Central District. Many offices and much space have already been leased to influential corporations, and it is said by the agents that other important leases are now pending.

TERMS—Cash payment; balance in yearly payments. H. D. BENTLEY, R. R. No. 3. 50-4t.

DAIRYMEN HOPE TO MAKE ALBERTA A BUTTER PROVINCE

That Alberta will become more and more noted as a dairy province, and that the dairy cow will be raised to a much higher pedestal than she occupies at present, is the determination of the Dairyman's association of Alberta, which held its sixteenth annual convention at Calgary last week.

In connection with the movement to increase the dairy production of the province, Mr. Love, manager of the Woodland Dairy, in a pamphlet distributed at the convention, made an interesting comparison of the dairy statistics relating to Wisconsin and Alberta. He showed that although Wisconsin has only about one-fifth of the area of Alberta, in 1915 she produced 127,683,025 worth of dairy products, as compared with Alberta's record of \$31,625,000 for the same year. Wisconsin had in 1915 nearly two million producing cows, and Alberta 356,585. The average production per cow in Wisconsin was 4,525 lbs; in Alberta it was estimated at 3,700 lbs. Mr. Love pointed out that climatic conditions in Wisconsin and Alberta are somewhat similar, and good dairy feed grows abundantly in both places, but in one little county in Wisconsin, called Green County, there are produced far more dairy products than in all Alberta. He added, "What is the matter with Alberta?"

The pasteurization of milk was one of the important questions discussed by the convention, and the following resolution was passed unanimously: "That the convention of Alberta Dairyman's again strongly recommend the compulsory approval of pasteurization of milk sold in all the cities and larger towns of the province; and instruct the secretary to take up the matter with all the city councils in Alberta."

It was pointed out that Dr. August, the deputy minister of public health for Canada, had gone on record as being strongly in favor of pasteurization. Those who objected to it, said Dr. August had urged the proper inspection of milk and of the farms where it was produced, but they forgot that a government inspector would probably be able to inspect a farm any time a year, and who was ever going to see that things were clean the other 364 days?

"The thing to do," continued Dr. August, "is to clarify the milk and get the dirt out of it, and then put it through a pasteurizer for the purpose of killing the bacilli. Fortunately all the disease producing bacilli, such as those which cause sore throat, diphtheria, measles and so on, are killed at the pasteurizing temperature. All infective organisms not spore-bearing are killed at one fell swoop, and pasteurization is the obvious thing to do. I think in cities there should be a bylaw to enforce the pasteurizing of milk. It is a public health necessity. You as dealers should have it done to protect your consciences, and your customers, and the health authorities would have it done for the protection of the people of the city."

The marketing and standard of butter was another live topic of the convention, and it was decided to exert every effort from the buttermilk standpoint, so as to improve the standard of butter and thus be in a better position to hold the market. It was pointed out that Alberta butter comes into competition with New Zealand butter, which is of a standard and uniform quality, and everybody present was impressed with the necessity of producing butter in better condition than ever before, and with this end in view, the buyers to pay for cream on a quality basis, the man who produces the best cream thus getting an advantage.

A number of other matters were dealt with. At the request of the buttermakers themselves, it was decided to continue the annual buttermilk contest in connection with the annual convention. The convention decided to (nearly) suspend the department of agriculture in regard to the dairy act and its efforts to improve the quality of cream. The department was also asked to forego holding future production before the provincial house to confer with the secretary of the association.

FARM FOR SALE

The S.E. 1/4 of 24-4-21 with 1 mile north of Wetaskiwin hospital. 50 acres broken; all new land, balance hay and pasture. All well fenced and cross fenced; good water from drilled well; all necessary buildings for farming. Write Box 221, Phone 515, or call and see J. Schroeder, Wetaskiwin. 50.

MILLET

Don't forget the big oyster supper at Payson's Hall next Saturday evening, March 15th. M. W. Molanauze, the bills say, has a message of great importance to give. We must hear that. Also that wonderful motion picture, "From Farm to Market" will be shown.

There will be a meeting of the farmers at the hall on Saturday evening, March 15th. M. W. Molanauze, the bills say, has a message of great importance to give. We must hear that. Also that wonderful motion picture, "From Farm to Market" will be shown.

V. C. French, editor of the Wetaskiwin Times, passed through Millet on his way to Edmonton Tuesday morning.

English church service—Holy Communion Sunday next, Feb. 27th. The Rev. Swann of Edmonton will take the service.

Methodist church service—Sunday, Feb. 27th. Larch Tree 11:30 a.m. Hillsdale, no service. Millet Methodist church, 7:30 p.m. Special music and an inspiring address "The World's Hope."

There will be choir practice on Thursday evening. Everyone who can sing is requested to be at the church.

Special evangelistic services will be given in Millet shortly. The Millet Methodist church and circuit are to be specially favored by securing a talented singer and evangelist, Joseph Robinson, of European fame. He comes with special commendation from the general secretary of social service and evangelism of Canada, Dr. P. Albert Moore. The opening service will be held on Sunday, March 6, at 7:30 p.m. at 11 a.m. West Liberty 2:30 p.m. Millet 7:30 p.m.

Coal Lake baseball club are putting on a concert and basket social next Friday, Feb. 25th, at 8:30 at Coal Lake school.

Qualter Jam Is Fresh

You may have noticed the fruit in Qualter Jam has the freshness and flavor it had in life. It is not allowed to wither or ripen, but is packed in the jars as it is ready. It is not cut off and put up within an hour or so after it ripens, just in the way our grandmothers used to handle it. This is the reason Qualter Jam is so good.

GEORGE L. OWEN, Auctioneer

Launching the Empress of Canada

The Empress of Canada, a twin screw geared turbine oil burning passenger liner, built to the order of the Canadian Pacific Ocean Service, Limited, especially for their trans-Pacific service, was recently launched at the yards of the Fairfield Shipbuilding & Engineering Co., Limited, Govan, Scotland.

The christening ceremony, which was performed by Mrs. C. M. Bosworth, the wife of the chairman of the Canadian Pacific Ocean Service, Limited, went through without a hitch.

The ship is 653 ft. long, 77 ft. 9 in. wide and has a depth to the bridge deck of 53 ft. 6 in. Her gross tonnage is about 22,000 tons, and she is arranged to carry about 400 first class, 106 second class, 238 third class passengers; and 477 of a crew. Of the cargo spaces, a large portion has been fitted for the carriage of silk. The ocean speed is about 21 knots.

The vessel is built to the highest class of Lloyd's register, to full Board of Trade requirements and sub-divided in full accordance with the requirements of the Bulkhead convention.

A complete system of telephones with a central exchange is fitted to the special and private suites and various offices, etc.

The dining saloon is on the upper deck and will accommodate 325 persons, a large reception room is situated forward of the dining saloon with passenger elevator at the fore end, on this deck also is a swimming pool 30 ft. long by 18 ft. wide, and a gymnasium.

Throughout the vessel special attention is everywhere given to the fact that the Empress of Canada is to serve in a semi-tropical climate; public rooms are therefore large and airy and the ventilation simply arranged.

The maiden voyage of the Empress of Canada will be a tour of the world, starting from Liverpool, March 15, 1921.

For wheat, are over. However, with world wide increase in transportation and handling costs, as well as in production costs, it is equally safe to assume that dollar wheat is also an absolute commodity. We may therefore expect a return lying somewhere between one and two dollars a bushel for the next few years. This is a wide margin, but it is fairly safe to assume that the price will be nearer one than two dollars. July wheat, at this writing, is quoted at about \$1.55 at Port William. From this must be deducted 24 cents at far western points, giving a net farm value there of about \$1.50. Farmers throughout the prairies are

now planning for next year's operations and the estimated cash returns for the possible product is an item that looms up largely in the horizon. From data now available, it would seem that nothing over \$1.50 per bushel of farm value for wheat would be a safe estimate for next year's crop.

The conservative farmer in the far western prairies will probably base his estimates at \$1.30 to \$1.40 per bushel. Taking everything into consideration, we should be prepared for world prices not exceeding the latter figure—Farm and Ranch Review.

THE FUTURE PRICE OF WHEAT
What has the future in store for the wheat grower? Our market lies principally in Europe and our customers there have at present little money wherewith to purchase. The high exchange rate against European countries is also getting to the breaking point. On the other hand European countries are straining every nerve to become self supporting. In the absence of widespread crop failure we might as well realize that the days of three dollar wheat, and even two dol-

Unreserved Auction Sale of Horses, Cattle, Sheep and Machinery

Having rented the farm, I will sell by public auction on the S.E. 1/4 of Sec. 22-46-24, 1/2 mile N.W. of Wetaskiwin, on Rose Creek Farm

Saturday, March 9

Many women will profit by the fol-
lowing statement of one of their sex:
"I was afraid to eat on account of
stomach trouble. Even rice did not
agree. After taking Adia-lax I can
eat anything." Adia-lax acts on
BOTH upper and lower bowels, remov-
ing food matter which poisoned stom-
ach. EXCELLENT for gas on the
stomach or sour stomach, guards
against appendicitis. It brings out
poisonous matter you never thought
was in your system. Northern Drug
Company.

PIMPLES AND BLOTCHES
ALL OVER HER FACE.

Pimples, blotches and all other un-
pleasant skin troubles are caused by
the blood being in an impure condi-
tion. This is the result of impure
food, on the nose, on the chin, and
other parts of the body, and although
they are not a dangerous trouble they
are very unsightly.
There is only one way to get rid of
them, and that is by purifying the blood
of all its impurities.

Burdock Blood Bitters is without a
doubt the best purifier for this purpose.
This valuable medicine has been on the
market for the past 42 years and its repu-
tation is such that you are not experimen-
ting with some new and untried remedy.
Miss Margaret Bridger, 61 Maine
Ave., Halifax, N.S., writes:—"I have
suffered very much during the last two
years from pimples and blotches, hav-
ing them all over my face. I tried different
remedies without any relief. I was then
advised to try Burdock Blood Bitters,
which I did, and after taking just two
bottles I have been a beauty. I feel perma-
ently relieved, and I haven't had a pimple
or blotch since. I can highly recom-
mend Burdock Blood Bitters."
B.B.B. is put up only by T. T.

Forty-Eight Years in "Canada's Western Empire"

Colonel John S. Dennis, C.M.G.,
who reads the plains of Alberta,
Baskatchewan and Manitoba 48 years
ago, when Indians and buffalo were
plentiful, knew more about "Canada's
Western Empire" than any other man.
He killed and ate the buffalo, narrowly
escaped being scalped by Indians on at least
one occasion, and hunted and built in
Alberta the largest irrigation sys-
tem in North America, reared thou-
sands of British and Canadian
in the United States during the re-
cent war and not only volunteered
for but saw service with the Cana-
dian Expeditionary Force in Siberia.
Now the four western provinces
of Canada have a population of
2,700,000, the buffalo are to be found
only in parks in the Canadian
Rockies and the Indians are at
reservations. There are nearly 200,
000 miles of railway in the four
provinces, or one mile for each 125
persons and of 22,500,000 acres of
good agricultural land, but 25,000,
000 acres are at present uncultivated
and cultivated. Of the balance, 190,
000,000 acres, some 20,000,000 acres
lie within fifteen miles of close rail-
way lines waiting for settlers.
"Think of it," says Col. Dennis, "and
the world crying out for food." His
view is that while Canada has won
a standing among the nations by her
work in the recent war so that to-
day the name "Canadian" is re-
cognized as distinguishing a citizen
of a progressive and virile empire,
Canada's share in the great struggle
has involved her in financial obli-
gations which can only be met and
discharged by increasing her popu-
lation and developing her vast
natural resources which, while
ample security for many times her
war debt, must be made productive
of wealth through development.
Between 1905 and 1914 about
2,500,000 people settled in Canada,
the largest proportion in the four
western provinces. They left Great
Britain, the United States and other
countries for their new home, and
Col. Dennis believes that 500,000
each year may follow them until
these provinces have a total popu-
lation of 10,000,000. Canada, he fur-
ther believes, is destined to be "the
keystone in the arch of the British
Empire."

SILK SHIRTS

Life had trained Elsie Dean for
economical witchcraft. Thrown upon
her own resources at 16 years, she had
struggled through a business course
for working for her board, and at 18
she secured a position which required
the maximum of feminine efficiency
and appearance and paid the minimum
in wages. She had "managed," as
clever girls do manage, to maintain
the reputation of dressing well by
scrupulous care and wise buying.

When love swept her off her feet
and he her down in a four roomed
flat with an adoring young husband
whose salary was barely sufficient to
cover the needs of the little household
Elsie was thankful for her years of
apprenticeship in the art of economy.
Her Harold was a dear boy, generous
to a fault with what he had, but he
could not be made to see the neces-
sity of the small economies which
Elsie understood so well.

"We're only young once, and we've
got to enjoy life as we go along," was
his favorite answer to Elsie's pro-
tests when he presented her with ex-
pensive theatre tickets or flowers. He
would look so boyish and happy in
presenting her with the gifts which
would cause her to do without some-
thing that after a few futile
tears she ceased reproaching him. In-
stead, she forced herself to stricter
economy, pretending she did not care
for breakfast eggs when the price
soared, and eating scarcely any lunch.
It was Harold sometimes to keep silent
when Harold recounted the menu he
enjoyed at noon. He acknowledged
that his lunches came a little high.
"The fellows from the office all go
out together, and they like to eat at
chummy places," he explained. "I can't
very well tell them I have to go to a
cafeteria since I married. You have
to keep up an appearance, you know."

So Elsie helped him to keep up his
appearance by learning to press his
suits and saving tailor bills and by
doing her own washing. She did not
need many new clothes, but she
found that she really must have a new
silk waist. She was thinking of the
price of silk and wishing she did not
have to buy now when Harold casually
remarked:

"All the fellows at the office wear
suits. Couldn't you make me one
silk waist? I feel like a goat going
around with these old woollen ones."
Everybody wears silk now.
Elsie had just reached the place in
her mental arithmetic where she
decided that by going without lunches
for a week she could buy her silk
waist. At Harold's words all her pen-
sion went to the wind. "Harold Dean,
I do think men are the most selfish
creatures in the world. If you want
silk lunches and silk shirts, why did
you ever get me married?"

At the last word Elsie's anger had
changed to exasperation at the idea
of a quarrel and she flew to the tiny
bedroom and threw herself sobbing
on the bed. Harold, grieved at this sud-
den attack from his long-suffering wife,
followed her anxiously and gathered
her into his arms. He carried her to
the big easy chair and comforted
her with tender words. He said she
must have been working too hard,
and he didn't give a hang about the
old silk shirt anyway.

Elsie lay awake far into the night,
grieving over the first bitter word
she had spoken to Harold, the first
break in the perfection of their home-
economy, willing to make any foolish
sacrifice to be at peace with her
husband. The next morning she took
her household money and went down
town to price silk.

She met Harold at the door that
night with his usual happy smile. He
kissed her twice for good measure
and then, picking her up, whirled her
around in a circle and danced, narrowly
escaping wrecking the tin tray.

"Elsie, you're the smartest little
wife in the world. Hereafter what you
say goes, and I'm going to cut down
on the lunches and everything. Today
I couldn't get away with the fellows
on account of some extra work and I
ran into a cheap little place for a sand-
wich. Who should be sitting at the
lunch counter but the boss! We had
quite a chat over our sandwich and
pie. And that isn't all!"

Harold paused for breath and drew
out his pay check. Holding it up to
Elsie's delighted eyes, he said, "See
that? A 10 shilling! The boss handed
it to me this morn'g. Said he liked to
see a young fellow that had sense enough
to know that he couldn't live like a
millionaire. He noticed I ate at a
lunch counter instead of at a restaurant
and that I did not wear silk shirts to
work. He said that fellows that wore
silk shirts didn't need a raise. He ex-
pected me to save that extra ten. So
here you are. If there's any money
wasted in this family, you're going to
be the one that wears them."

OWES HER LIFE TO
"FRUIT-A-TIVES"

After Years of Suffering with Dyspepsia, this Fruit Medicine Gave Relief

Mlle ANTOINETTE BOUCHER

917 Dorion St., Montreal.

"I am writing to tell you that I owe my life to 'Fruit-a-tives' for this remedy relieved me when I had abandoned all hope of ever recovering my health. I suffered terribly with Dyspepsia. I had it for years and all the medicines I took did not do me any good. I read something about 'Fruit-a-tives' being good for all Stomach Troubles and Disorders of Digestion so I tried them. After finishing a few boxes, I was entirely relieved of my Dyspepsia and my general health was restored."

I thank the great fruit medicine, 'Fruit-a-tives', for this wonderful relief.

Mlle ANTOINETTE BOUCHER.

50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

CITY BAND ORGANIZES

A meeting called for Monday night in the U.P.A. room resulted in the organization of the city band.

Present: Father Walravens, D. J. Biddiger, T. P. Higginson, B. T. Hanson, G. H. Russell, A. T. Schmidt, Dr. E. Schmidt and A. H. Livoradio.

Dr. E. Schmidt was elected chairman for the evening.

Moved and seconded, that the Wetaskiwin Brass Band be organized. Carried.

Moved and seconded, that Father Walravens be leader. Carried.

Moved and seconded, that A. H. Livoradio be business manager and secretary treasurer. Carried.

Moved and seconded, that band meet for practice twice a week. Carried.

Moved and seconded, that monster Edna bass be returned from Carrouse band. Carried.

Moved and seconded, that repairs to Mr. Russell's horn be made. Carried.

A lengthy discussion followed as to rent of hall, heating and lighting, also as to the correct number of horns owned by the city and by private individuals.

The following players have enrolled: Father Walravens, Conductor.

B. J. Biddiger, Cornet.

T. P. Higginson, Clarinet.

B. T. Hanson, Trombone.

G. H. Russell, Baritone.

A. T. Schmidt, Bass.

E. E. Schmidt, Alto.

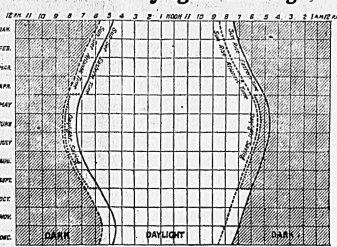

E. E. Mills, Cornet.

Forbes Atkinson, Steno.

Meeting adjourned after a vote of thanks had been tendered the chairman.

Why The East Wants Daylight Saving

Within a few weeks, the question of daylight saving will probably once more become the subject of more or less heated debate which business men, city fathers, farmers with cows to milk, mothers with children of school age to look after, and last but not least, railroad men with time tables to print and train men to run if possible to the minute, will devote for daylight saving will point out that in England the economy in coal consumption effected by daylight saving during the summer months amounted to \$2,000,000. The demand for daylight saving, however, is most insistent in Eastern Canada and the Eastern States and for every insistent demand, there is usually a real reason. The reason, apparently, is that the present standard time in force in the area of the first fast Eastern Standard time is based on the mean sun time upon which the actual length and intensity of daylight is based. Standard time is convenient arbitrary established in order to secure uniform time in all the boring communities or places. The sun is travelling from East to West from the noon hour originally travelled with it, but it was found advisable to fix definite areas in which the noon hour and other hours were to remain the same for the convenience of the operation of railroads and telegraphs and the transaction of business wherein contracts involved definite time limits.

Prominent Western
Man Praises Tanlac

G. W. Logan, Peabody, Kansas

"Tanic has completely restored my health and I feel better than in years." was the straightforward statement recently made by Mr. George W. Logan, of Peabody, Kansas, one of the most prominent stock-dealers in the Middle West.

"I had not only made a new man of me, but I have actually gained thirty-five pounds in weight and feel as well as I ever did in my life. I am telling all of my friends about Tanlac, but they can see for themselves what it has done in my case."

"When I began taking Tanlac I was in an awfully run-down condition. I was away off in weight, felt weak and nervous all of the time and could not take any interest in my work or anything else. My main trouble was

indigestion. Nothing seemed to agree with me. At times I would have dizzy spells and at other times my back would ache so bad that I could hardly get up and down in my chair. This is just the condition I was in when I started to take this medicine. It took just six bottles to make a new man of me. I now have a fine appetite, everything tastes good and my digestion is perfect."

"My wife was also troubled with indigestion at times and it relieved her the same way. You may publish my statement wherever you like, and if anyone doubts it, just tell them to see me."

Tanic is sold in Wetaskiwin by the Nordham Drug Co.

EDUCATIONAL FACTS

Canada has 21 universities.

School attendance, calendar year

1919, 1,154,800, or 52.61 per cent of

total population.

Canadian educational increase, 1862

to 1917: Schools, from 10,000 to over

26,000; teachers, from 11,000 to over

29,000; pupils, from 64,000 to 1,257,000;

spent upon education, from \$2,600,000 to approximately \$56,000,000.

First school opened in Canada at

Quebec in 1632. Grammar schools

were founded in Upper Canada (now

Ontario) in 1807, and common schools

in 1816.

Persons who can read and write, of

population of five years of age and

over, \$8.18 per cent in 1911; \$2.82 per

cent in 1901. Illiterates: 10.89

per cent in 1911; 14.38 per cent in

1901.

Increase in population, five or over,

1901-11, \$3.93 per cent. Number who

can read and write increased by 43.4

per cent; of those able to read only,

decreased by 74.64 per cent.

Carnegie Corporation has given over

\$2,000,000 for over 150 Canadian li-

braries.

HEART AND NERVES

BOTHERED HER.

Housework Played Her Out.

Mrs. Earl Farr, Ogema, Sask., writes—

"Three years ago my heart and nerves

began to bother me. I could not do my

housework without being almost

completely played out. After averaging a

small room I would have to sit down and

rest, and would feel as if I could not get

enough air."

Every few nights I would have horrible

dreams, such as the well-caving in hall

I was pumping a pool of water, or the

children, or my husband falling in, and

I could get no rest, as I would be awake

some time after. I was very nervous and

he told me it was my nerves, that

they had been shaken by a previous ill-

ness. He gave me some medicine, but as

soon as I was gone I was as bad as

ever. I got half a dozen bottles of

Milton's Heart and Nerve Pills, and

they helped me so much I got more, and

can truly say I have no lack of health

now, and don't feel so tired after a good

day's work, as I did before after sweeping

one small room; also have had none of

those horrible dreams for months and

months.

TOWN TOPICS

The regular spring meeting of the Wetaskiwin Presbytery will be held in this church on Feb. 25th and 26th.

There will be four eclipses during 1921—two of the sun, both visible in Canada and two of the moon. The latter will be seen on the nights of April 22nd and October 16th.

The annual meeting of the Committee on Cooperation between the Methodist and Presbyterian churches for Wetaskiwin district was held in the Kings church last Thursday. Mr. J. F. Fowler was elected chairman and Rev. J. M. Pritchard secretary. The meeting was a very short one, as only routine business was brought up for discussion.

The young people of the Methodist church, with some invited friends, spent a pleasant time on Saturday evening last at a suburban party. The young people drove out to the hill that lies north of our city and spent a couple of hours at that exhilarating Canadian sport known as tobogganing. The party was chaperoned by Mr. and Mrs. Alexander, Mr. Wilkins and Miss Minor. The outing over, the party proceeded to the church, where games were indulged in and a lunch served by Mrs. McIlroy and Miss Moore. The party broke up about 11 a.m., all feeling they had had a most enjoyable time.

An eight year old girl in Chicago, called continuously for 212 hours, and the cause of this phenomenon has not yet been discovered by the doctors.

EXAMINER'S REVIEW OF THE MARKETS

CATTLE—Prices on everything except the top beef cattle have been shaded at Edmonton during the week. Choice steers \$7.00 to \$7.40; good \$6.00 to \$7.55; medium \$5.00 to \$5.50, and common light ones down to \$4.00. Choice cows \$6.75 to \$8.25; good \$5.00 to \$5.50; medium \$4.00 to \$4.50; common and canners down to \$2.50. Steers and feeder demand not brisk; feeder steers \$6.00 to \$6.25; stocker steers \$4.00 to \$4.50; stocker heifers \$4.00 to \$4.50; cows \$4.25 to \$4.50. There is a weaker tone on calves, with choice light worth up to \$10.00. Receipts light and shipping not encouraged at present.

HOGS—Hog receipts also light at Calgary, and market Thursday was \$14.00 to \$14.25. Sales on light market today at \$14.00 to \$14.25.

Hogs have also been selling higher at Edmonton, with the price \$15.75 on Thursday.

SHEEP—Sheep at Edmonton are scarce, and prices are steady with last week's prices, hams \$9.00 to \$10.50; wethers a little better, \$8.00 to \$9.25.

HORSESHES—Auctions during the week at Calgary very slow, and prices hard to quote. It is still a buyers' market. **GRAIN**—Flourishings during the week were slight; Canadian milling demand taking quite a lot of our wheat. American markets stronger at times because of reports of grain bug damage in southwest. Export business light.

PRODUCE—All lines very quiet, and few changes. Some creamery prices likely to drop soon; dairy butter slow except fancy table, which brings 35c to 40c at markets; of grades down to 29c. Eggs higher and quoted on wide spread \$12.50 to \$15.00; comest market higher. Poultry market slightly higher, with fowl and chicken 15c to 22c; dressed birds at market stalls bring 30c to 55c. Potatoes still slow and no market outlet; country prices \$2.00 to \$2.50; western American prices lower; H.C. unchanged.

Trade opinion at Edmonton inclined to lower prices on creamery butter though for present unchanged. Entry factor still lacks demand. Any drop in creamery prices will be reflected in retail prices, but they are still the same. Wintry weather in Alberta and a stronger market at the coast has advanced eggs. Poultry receipts light and shipments absorbed by retail trade; food store springs are catching up.

HAY—Western weather causes slight demand for hay, but no trouble in buying. Buyers still off the market, but paying \$15.00 to \$20.00 for (timothy and prairie hay from \$15.00 down, for limited quantity, country prices.

WOLLS—Western wool continued to exist nearly all sold; lower grades bring 24c down.

HIDES—All classes of hides still weak in market and prospects of revival for a time. Dealers quote beef hides 25c to 4c.

BIRD PROTECTION

On Feb. 12th, at the University of Alberta, to a large and representative audience of sportsmen, farmers and teachers, a lecture was delivered on the Migratory Birds Convention Act by Associate Professor Rowan, Department of Biology, Honorary Federal Game Officer of the Province of Alberta.

The lecturer dealt at some length with the general conditions that have accounted for the great reduction of our native birds, and proceeded to demonstrate that this reduction is a serious menace to the future welfare of agriculture, finally explaining the main provisions of the Migratory Birds Convention Act. Following on the reading of the paper a series of beautiful lantern slides were exhibited illustrating the main types of birds dealt with under the act, with some remarks on how the pictures were secured.

Among the points of main interest brought out by the lecturer were the following: Panning and mining, followed by the inevitable railroads, are making all parts of the province accessible to gunners. Unrestricted shooting in the earlier history of the country played havoc with many species of birds. A number are nowadays considered rarities, while others have been entirely exterminated. One of the main objects of the Migratory Birds Convention Act is to shield these remnants, no matter how easily they may be reached by feeding grounds may be reached by sportsmen, and give them an opportunity of recovering from their present critical status. By this means it is hoped that all game birds now protected throughout the year, instead of becoming extinct, will one day again figure in the sportsman's legitimate bag.

The importance of birds to agriculture is always underestimated. They are essential to the very existence of the crops of the land, and are most essential; the insects, weed-eaters; the warblers and scores of other insect eaters, grain loving robbers, weasels and hawks would either combine to make agriculture an impossibility. A number of facts were recounted in support of this statement. Another fact, therefore, of the act is to encourage, on behalf of our greatest industry, farming, the preservation of our birds. The number of harmful species is very, very small, and for the protection is not sought.

The act is international, being a mutual agreement with the United States. Our birds are therefore, protected, at all events over the greater part of their yearly range and in the case of many species, over the whole of it.

MUNICIPAL HOSPITAL

(Continued from Page 1.)
hospitals in operation were submitted by Mr. Whitson.

For the full year 1920 the Mannville hospital cared for 378 patients, of whom 42 were non-residents. It was found necessary to add three extra beds. It will be necessary this year to increase the accommodation further, 68 maternity cases and 14 major operations were treated.

From March to December the Vermilion hospital admitted 295 patients, of whom 55 were non-residents. Fifty maternity cases and 71 operations were provided for.

In Lloydminster 345 Alberta patients were cared for, 5,612 patient days, 25 major operations and 63 minor operations, and 62 maternity cases were provided for.

At Onoway 541 patients were admitted and 193 visited at their homes by members of the hospital staff. During the years that the Onoway hospital was operated under the Anglican mission, and for the first year after being taken over by a municipal hospital there was no doctor in the district. Dr. Walnwright, for many years at Walnwright, moved to Onoway last September and the work of the hospital has practically doubled.

The present accommodation will not be adequate this year. At Drumheller, from September to December 21, forty-five typhoid fever cases were treated at this hospital. By a contract with the miners, the hospital is made available to the miners and their families upon payment of a fee of one dollar a month.

At Lethbridge, from March to December, 115 cases were admitted. At Cardston 249 cases were taken, including 69 maternity cases and 20 major operations. At Bassano 264 cases, including 81 maternity cases, 21 major operations and 54 minor operations. One of the most conspicuous benefits resulting from the building of these hospitals is the location of doctors in places where none were before.

Besides the Onoway hospital, already mentioned, a doctor has located at Lethbridge, another at Mannville and another at New Norway, in anticipation of the Camrose scheme the doctor at Vermilion has closed his private hospital.

U. F. A.

The Wetaskiwin locals are reserving St. Patrick's Day for a dance in Angus Hall, Wetaskiwin.

The Nashville local of the U.F.A. hold a Valentine social on Friday evening last, when a most enjoyable time was spent. A debate took place on the subject, "Which is the more useful on the farm, the tractor or the horse?" The claims of the motor were upheld by Geo. Bevan and Gordon Thirsk, and the defenders of the horse were Ernest Harris and Herman Kalene. The horse won by two points. A musical program was also rendered and refreshments were served.

The John Knox local U.F.A. is giving a card party and dance in Angus Hall on March 4th, at 8:30. Good music. A cordial invitation is extended to all members of the U.F.A. and the U.F.W.A.
